Ms. Linda Ketellapper, SFD-7-5
US Environmental Protection Agency, Region IX
Superfund Division
75 Hawthorne Street
San Francisco, CA 94105

RE: Request for information—Omega Superfund Site

August 15, 2007

Dear Ms. Ketellapper:

In response to your request of August 13, 2007, we are providing the following information:

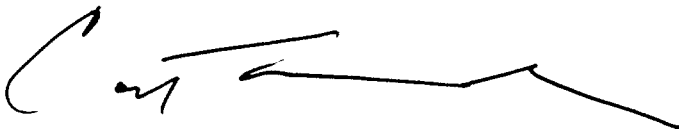

- 1) The person providing you with this information is Mr. Carl Troncale, 11919 Rivera Road, Santa Fe Springs, CA 90670. I am the President at the facility, and I can be reached at (562) 945-1181. I have been at the facility for over 30 years.
- 2) The property is owned by Cal-Tron Plating Inc., and we have included a copy of the property tax bill for the property.
- 3) We have been operating this facility for over 30 years.
- 4) We do not remember who was at the facility in the past. We can probably get this information if it is required.
- 5) We have operated this facility for over 30 years.
- 6) The facility is a metal finishing facility, providing polishing and plating for customer supplied parts.
- 7) I am familiar with the use and disposal of hazardous wastes at the facility. My contact information can be found above. At this time, I am not prepared to provide you with my Social Security Number, as this is personal information that I do not want to share with you.
- 8) The property has been a metal finishing facility for the past 30 years. We have included a plot plan of the facility with this letter.
 - a. There is approximately 20,000 square feet of building. Tanks and containment is shown on the plot plan.
 - b. There is a clarifier at the facility. This clarifier is used for final treatment of our wastewaters before they are discharged to the POTW.
 - c. To our knowledge, there are no ground water wells at the facility.

- d. Stormwater drainage at the facility is via surface sheet flow. The sanitary sewer system uses a clarifier before discharge to the POTW. There are no known septic tanks or subsurface disposal fields at the facility.
 - e. No new buildings or structures were added to the facility in the last 30 years.
 - f. Waste accumulation areas are shown on the plot plan. There are no waste disposal areas, dumps, leach fields, burn pits, or any other disposal locations.
- 9) We do use hazardous substances at the facility. We have included the Material Disclosure for our facility that details the chemicals and the quantities that are stored at our facility. MSDS's for these items are very extensive. Most of these items are available on line, or in EPA files. The EPA is very familiar with the Metal Finishing industry and has extensive files on our operations. If there is a particular MSDS that you need, please let me know, and I will provide it to you.
- a. Please see the Material disclosure documentation included.
 - b. The hazardous substances and wastes are used for metal finishing.
 - c. Please see the Material Disclosure documentation included.
 - d. We produce corrosive wastes and sludges from our wastewater treatment operations. These wastes are identified by the EPA as D002 and F006 wastes. Please let me know if you need a detailed description of these wastes. We also generate wastes from polishing dusts, which are listed California Wastes, but are not listed with the Federal EPA.
 - e. The facility has many permits from air quality, sanitation district, stormwater discharges, and the City of Santa Fe Springs. Please identify the specific permits that you require, and I will provide them to you.
 - f. A copy of the Hazardous Materials Disclosure is included with this letter.
 - g. We have provided you with a summary of the wastes that we have disposed of in the previous year. If there is a specific manifest that you require, please contact me.
- 10) We have no knowledge of hazardous substances releases above our permit conditions as identified by the agencies that provide us these permits. Minor violations have been issued in the past, but we know of no enforcement action that is pending with any of the agencies.
- 11) We know of no knowledge of any remediation or cleanup conducted at this facility during our ownership.

If there is any specific information that I can provide, please feel free to contact me at (562) 945-1181.

Thank you for your help and cooperation.

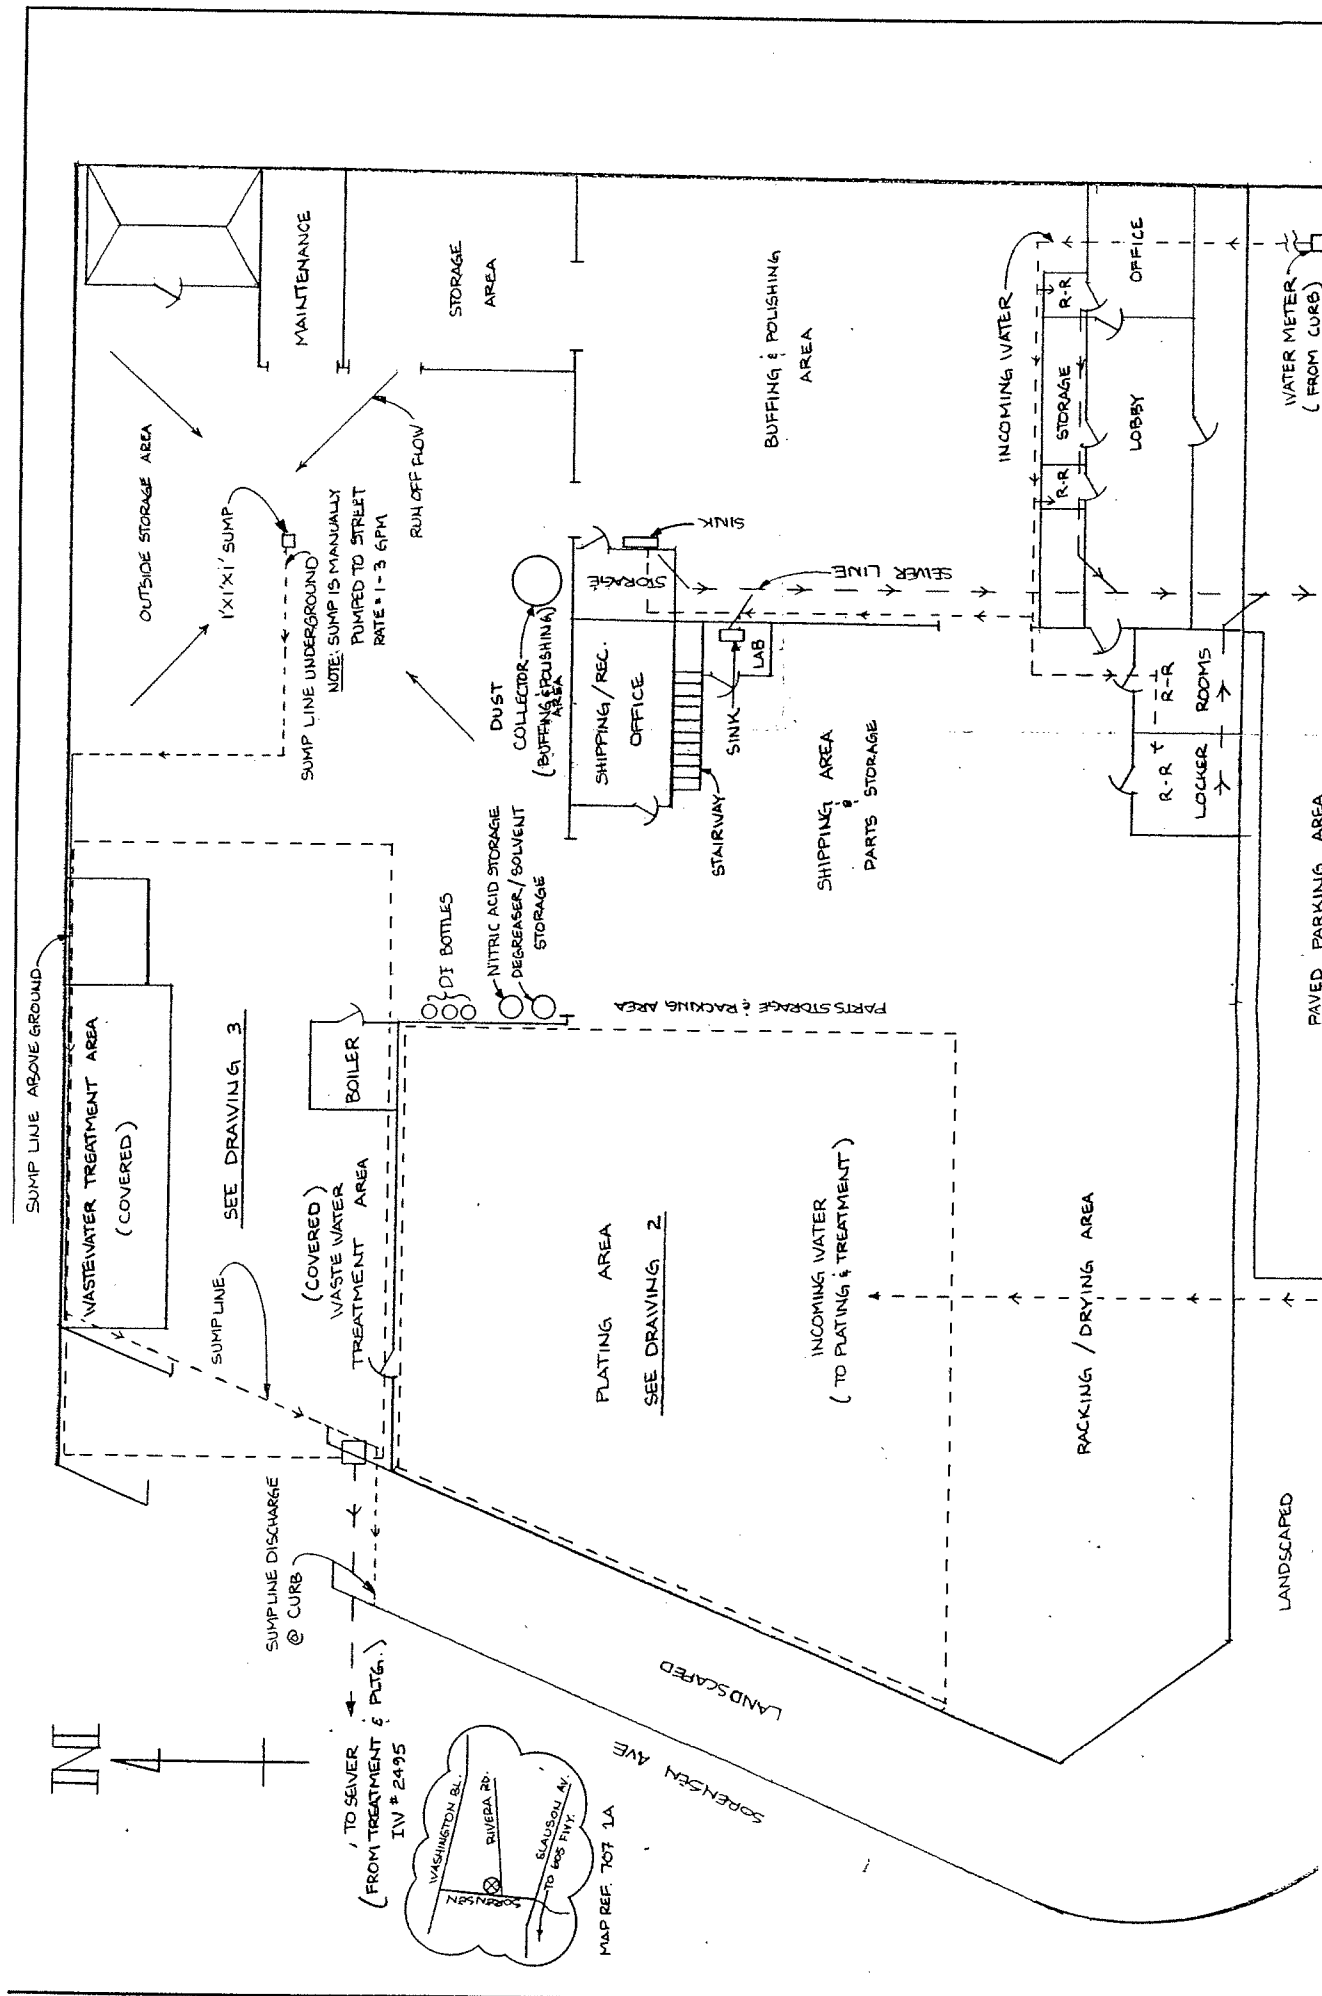

Sincerely,

A handwritten signature in black ink, appearing to read 'Carl Troncale', with a long horizontal flourish extending to the right.

Carl Troncale,
President
